

## ROMAN TEXTURED

### Distinctive elegance of the Mediterranean

The Metrotile Roman recreates the authentic look of traditional natural clay roofing used throughout the Mediterranean. Its distinctive shape and pronounced profile makes the Metrotile Roman unique among stone-coated steel tiles. Available in several blended colours inspired by this region, Metrotile Roman provides the visual appeal of this elegant style but without the inherent weight and cost.

Extensive research and development in the design process ensures every Metrotile product is manufactured to the highest quality with exceptional durability and strength. The tile profiles and roofing accessories are engineered to interlock and overlap to resist wind lifting and keep out the harsh elements. At less than 7kg/m<sup>2</sup>, a Metrotile roof is a 'Lightweight Roofing System', so considerable cost savings can be achieved during construction. The perfect replacement for your old existing roof, a Metrotile roof lets you improve the look and value of your home in a matter of days.

All of Metrotile's roofing products are fabricated from Zinalume<sup>®</sup> protected steel. Metrotile's textured finish provides added protection by embedding natural stone granules in an acrylic base-coat. A final clear acrylic over-glaze is applied

before being oven cured. This extremely durable UV-resistant coating enables Metrotile roofing products to withstand the harshest environments around the world.

Metrotile is ISO 9001 accredited. International test reports, appraisals and field results confirm our products are 100% waterproof, earthquake safe, fire resistant and able to withstand hurricane-force winds of up to 190kph. A Metrotile roof will not only safeguard your investment but will also give you complete peace of mind because it's backed by a Metrotile warranty.

You will not find a more durable, versatile and attractive roofing product on the world market that will surpass Metrotile's quality and affordability.

**Minimum roof pitch: 12.5 degrees**

50 Years Weather Security Warranty\*

Interlocking System Earthquake Resistant
