

Metrotile

The lightweight stone-coated steel roofing systems

Metrotile® is manufactured by the Ross Roof Group who has been involved in the roofing industry since 1942. RRG is an innovative and dynamic manufacturer and supplier of stone-coated steel roofing tiles. With their roofing tiles now installed in over 80 countries and proven in some of the most extreme weather conditions, the Ross Family has gained status as a world leader in roofing.

The Metrotile product range comprises of nine distinct profiles: Classic, Antica, Bond, Shake, Shingle, Tudor, Royal and CF Shingle. This range caters for all types of construction, from residential to light-commercial and public works.

All of Metrotile's roofing products are fabricated from Zincalume®-protected steel. Metrotile's textured finish provides added protection by embedding natural stone granules in an acrylic base-coat. A final clear acrylic over-glaze is applied before being oven cured. This extremely durable UV protection coating enables Metrotile roofing products to withstand the harshest environments around the world and retain their look for decades to come. Metrotile roofs are earthquake, fire and freeze/thaw resistant and can withstand hurricane-force winds of up to 190kph.

Available in a wide range of colours, Metrotile products are lightweight, versatile and easy to install. Because Metrotile is ISO 9001 accredited, a Metrotile roof will not only safeguard your investment but will also give you complete peace of mind because it's backed by a comprehensive Metrotile warranty.

50
YEARS WARRANTY

50 Years Weather
Security Warranty*

Tudor

For a more traditional or solid enduring look of a clay tile, yet without the weight, the Tudor range is one of our most popular profiles.

Classic

For one of our most popular profiles, the Classic's clean lines and sloping edges create added depth and enhance dimension to your roofline.

Shake

For a textured finish with wood-grain appearance of traditional shake. Deep ribbed profiles add dimension and shadow lines to create visual contrast.

Bond

For a distinctive scalloping profile that complements any architectural style, with the lightweight advantages of a steel tile.

Royal

For a low profile shingle appearance, yet with the strength and durability of a press metal tile, the Royal profile is the ultimate product.

Shingle

For the subtle look and charm of low-profile traditional shingles, yet with all the strength and durability of a stone coated steel tile.

Antica

For the strength and graceful feature of the Mediterranean tile, the Antica profile is the ideal choice.

CF Shingle

CF Shingle has been specifically designed to resemble the look of traditional Asphalt Shingles but without the inherent ongoing issues that many home owners face.

Roman

For the authentic look of a traditional natural clay roof used throughout the Mediterranean, the Roman profile is the ideal choice.

proudly made in New Zealand
